

What's wrong with New Zealand?

In the past New Zealand was able to say NO to imperialism and people lived good lives. Today, many working class males are working 10+ hours per day, doing dangerous work 6 days per week. They would rather fuck a pocket pussy (sex toy) than get married. Also, many women are feminists (immoral, greedy and man-hating). New Zealanders live primarily for “pleasure” instead of living for Eternal honour.

The laziness has led to a corrupt government that serves only its own interests. We support a global military empire, the Anglo-American Regime, which invades independent countries and seizes the natural resources while Kiwis play online games and watch TRAP porn.

Now is the right time for us to destroy Nazi America and make New Zealand an independent nation again!

Email politics@jeff-mitchell.co.nz and I will guide you on how to use propaganda and sneaky tactics to bring down governments. In the meanwhile educate yourself with these

Anti-imperialist websites:

Do not believe the lies of mainstream media who use race-baiting and gender politics to divide us!
